

Oncology-Specific Mobile Application

Overview

Overview

Mobile-Angel is an oncology-specific mobile app that connects your care team to patients and caregivers in a simple and effective way. Using Mobile-Angel can reduce your anxiety, improve your treatment outcome, and reduce your costs of care. Reimbursement is also available with ICD codes 99453, 99454, 99457, 99091.

The Mobile-Angel app puts your care team and patients in immediate contact and constantly monitors care through instant messaging, medication reminders, and lifestyle questions to adjust for each patient's specific needs.

Advantages of the Mobile-Angel Application

- Powered by secure, HIPAA-compliant Azure CLOUD
- Free, quick to set up, and simple to use; no EMR integration required
- Real-time tracking of medication compliance and toxicities
- Built-in triage system for the clinic staff
- Instant messaging system for immediate communication
- Simple output to store in your EMR
- Scalable worldwide
- Free App Store download
- All data is anonymized and usable for AI/ML

How Does Mobile Angel Help?

Cancer patients benefit in many ways from early, continuous, and proactive monitoring of toxicities and medication compliance.

Mobile-Angel provides a prioritized list of your patients based on their self-reported status. Each patient answers several questions daily to track both physical and emotional status.

This summarized information is prioritized on the home page/patient list of the app. The clinical staff can instantly see on their mobile device, which patients need attention and why. A single button connects the staff with the patient via text, phone, or email.

All Mobile-Angel data can be easily output and incorporated into the patient record.

Mobile-Angel enables instant, proactive, and prioritized communication with patients. Unlike “patient portals” and 800 numbers that enable an email or voicemail-type link where communications are queued and not prioritized, Mobile-Angel instantly flags important toxicity and medication compliance concerns and presents them in an obvious and actionable mobile list.

All critical information is presented in a single screen, on your mobile device, with one touch text, email, or calls directly to your patients. This type of patient engagement has been clinically proven, and peer-reviewed, to have significant positive effects on outcomes, costs, ER visits, in-hospital admissions, patient stress, and care compliance.

Clinic Reimbursement

Probable:

~\$154-174/patient/month reimbursable *

\$369K- 417K additional revenue per Oncologist **

CPT code 99453: "Remote monitoring of physiologic parameters, initial set-up and patient education on use of equipment." \$19.46.*

CPT code 99454: "Device(s) supply with daily recording(s) or programmed alert(s) transmission, each 30 days." \$64.15/mo.*

Encouraging Patients to Setup and Use Mobile-Angel

Using Mobile-Angel can reduce patient anxiety, improve treatment outcomes, and reduce costs of care. Many peer-reviewed clinical trials have been conducted on various aspects of engagement with cancer patients, including mobile apps.

Major takeaways from such trials include a 50% reduction in anxiety, 12.5% reduction in inpatient hospital admissions, 6.6% reduction in emergency department visits, and a 16% improved median overall survival at 24 months.

The Mobile-Angel app puts your care team in immediate contact with patients and caregivers to monitor care through instant messaging, medication reminders, and lifestyle questions to track their individual needs.

How Mobile-Angel Uses Your Reported Data

Mobile-Angel is dedicated to the medical community as a whole. By using the Mobile-Angel application, you'll help us to collect data on treatments, side effects, and lifestyle changes. This data will help clinical teams and researchers provide better care and work together in mitigating side effects for patients.

The data we collect is anonymized and all identifying data is removed. You can opt-out of the use of your data at any time by selecting the "Opt-out" menu and choosing "Do not share my data."

Refer to the individual user guides for additional details for Staff, Patients, and Caregivers.
